Title: Ergonomic Length Leaching Chamber

Attorney No. 2222

INFORMATION DISCLOSURE STATEMENT

Applicant encloses two sheets of substitute for Forms 1449 and requests that examiner consider the information listed in the forms and that he return to applicant initialed copies thereof, to indicate his consideration.

Sheet 1 lists brochures which are submitted mainly for their pictorial content, in showing actual installations of leaching chambers and stormwater chambers.

Document A, "The Equalizer..." shows on its pages 1 and 3, a leaching chamber being installed in a narrow trench with an installer at the end of chamber, lowering the last chamber into the trench. On page 2 the spaced apart trenches of leaching chambers are shown.

Document B, "Recharger..." shows at page 2 stormwater arrays in pits on gravel beds, and on page 3 a wastewater (leaching chamber) installation.

Document C "Isolator™" at page 1 shows stormwater chambers being covered with gravel; and at page 2 an array of chambers.

Document D "Stormwater Management..." shows a partially filled stormwater chamber pit on page 1 and 3. See also page 2

Document E "The High Capacity H-20..." shows an array on chambers on a gravel bed on page 1, 4, and 5. Note at the top right of page 3, Requirement 1, which states that the excavation should be bigger than the array of storm chambers to be placed in the excavation, to allow for proper fit. That is, to avoid having the chambers near the walls of the pits.

Sheet 2 lists patents and selected sections which relate to how storm chambers are installed as arrays of chambers. The relevant parts are noted on the Form. They show again the nature of the art, that there are arrays of parallel rows of chambers.

Respectfully submitted
